Content-description: Mail message body

I'm on the same page. Either H-P 410B or C is a good meter IF the diode in the RF probe is good. I've seen a lot of them missing the RF probe altogether. I have one of each, but keep the 410B on the bench.

The Heath VTVMs are good meters if they aren't beat up. And if it doesn't have a probe, they are easy to make. Not in the same class as the H-P, but good enough for most work if all you need to do is tune some slug for a peak RF reading.

I have a V-7A, with RF probe, that I built in 1957-8 sometime. Still use it frequently. Certainly the most lasting "investment" I've ever made in a piece of test equipment :-)

Don't have a Globe 6 meter rig...

However, maybe I need to use *MY* Triplet model 666 more often, since they are so devilishly handy in troubleshooting tube gear.

Yep, I got one too. Nearly new in the box, guess the previous

owner was afraid to use it.

A listmember just wrote

>It does hear NBFM, however. That was during our collective
flirtation with HF FM

So this's sorta on-topic

My side-kick @ AWA meet brought back a Sonar "NBFM exciter." It's
got a 5Y3, a 6V6, & 2 6SL7s. He's been to the bama cupboard &, save for
a VFX680*, the bama cupboard is bare.

Anyone out there have the skinny?

Thanks

Marty

* since I was WN8VFX as a kid, mebbe I shud have one

Opinions are like you know what (and everyone has one) but I never liked Triplet VOM's. When they were still being sold new, for the same \$ you could buy a Simpson 260. The Triplet ohmmeter leads were reversed polarity, like most of the cheaper imports (the Simpson wasn't). The Triplet lacked a meter reversal switch (the Simpson has one, and it works on Ohms, which makes checking front-to-back on diodes and transistors simple. Likewise makes it somewhat usable for rough NP capacitor checks). The Triplet requires moving the range switch to go from DC to AC (on the Simpson, it's part of the reversal switch). Etc.

Simpson made a nice little VTVM as well, in the same form factor case. And a whole line of special purpose clip-on adaptors for the 260.

Incidentally, if anyone knows a source for the Simpson 260 ohmmeter battery contacts, I'd be happy to hear of it. Ohmmeter battery leakage was always a problem with all of the VOM's (especially in a climate like Houston's), and I have a couple of 260's that I could put back into service if I could locate new contacts.

The Albuquerque Hamfest ran last Friday evening and Saturday. Several neat things followed me home including a Lysco 600 Transmaster, dirty but all there, for \$10, a 1930's vintage National Speaker with some chipped paint for \$15, SW-3 bandspread coils in their original National boxes for 160 and 80 meters (14A and 15A), and a homebrew, single 811 linear amplifier ala the 1965 ARRL Handbook for \$20. I also saw several S38's, BC453's, a Heathkit Mohican, a DX-100, and a Ranger without its crystal cover with an asking price of \$250. Shades of "the good old days."

I went home happy!

Jim, W8KGI

For the ghoulish oldies one could always listen to an Atwater Kent 666 automobile radio (1934). Or in more modern days (now off topic) the sand state Olympic 666 radio and then test then with the Weston 697 / 666 Radio Tester.

I'm in need of the little ceramic crystal adapter to take the HC-6 style crystal (small pins) and adapt it to the FT-243(.093 size pin) - spacing is the same on the two crystals.

Thanks

Bob

Does the mental image of zombies holding 35Z5s aloft around a Eico 666 evoke any glint of recognition.?

Since the "Frequency" movie painted a confusing plot around a HeapS rx, perhaps some there could be a re-make of "night of the living dead" pinned to this theme.

Of course it, like all recent remakes, would have a re-pigmented cast. F'instance the Manchurian Candidate with the W. Smith -> Sinatra celebration.

I DID just bite my tongue

Gang-

Here are the real basics of how to keep me happy, the list noise-free, and everyone able to enjoy BoatAnchors... Simple, easy, workable...

Do not send SPAM-type e-mail messages to the list.

Do not send attachments (attached files) of *ANY* sort to the list. This includes HTML shortcuts, v-cards, GEDCOM files, zipped files, and *ANY* other type of attachment.

Do not EVER forward virus warnings (which are 99%hoaxes) or send chain letters to the list.

Do not use HTML or RTF (rich text format) in messages sent to the list.

DO keep e-mail messages to the list on topic and appropriate.

Do not post commercial messages.

Please refrain from posting "Ebay" type auction notices. Refrain from "seen on EBAY" posts...

DO be polite.

Do not flame other members of the list.

DO be considerate of the list members and list resources.

DO have fun!

A SBE-33 followed me home from the Ellijay, GA hamfest. I could not find it on BAMA. Does anyone have that schematicv? I have a copy of the manual.

Thanks
